morning. The offerings caused some irregularity, and there were occasional spurts of Southern selling, but the contracts were promptly taken on reactions of 15 or 20 points, with the market firm late in the morning. October solid up to 26.45c and December to 24.95c with active months generally showing net advances of 57 to 95 points. Business then became less active and there were reactions of 20 to 30 points early in the noen hour. Large Section of Belt Gets Rain Which Is Not Needed and Shorts Cover Freely.

Thursday Afternoon, Sept. 2. Thursday Afternoon, Sept. 2.

Rains which were not needed and which will add to the troubles the crop is experiencing afforded one of the chief pretexts for liberal covering by shorts today. There was also a more cheefful prospect in the labor situation in Great Britain to encourage dissipation of some of the gloom which has overcast that section, consisting of information that chances favor avoidance a general strike. On this side pessimism was less rampant and the grain markets were considerably stronger, which tended to Open High Low T'day, Prev

More talk of realization from the sput department was also a factor. Most of the buying was from the short interest, and covering by one large operator in particular received mention in the gossip. notine as to conditions on the continent, while private cables said that some buying came from this side. Later no doubt the chance of not having a big strike was a factor, though nothing definite was given out and it was largely a matter of opinion. Finals were irregular and from \$2 to 33 points to the bad. Spots were marked off 40 points, fully middling to \$3.604, with sales 4,000 bales, including 2,900 American, and nothing was received.

The governing influence on this side was a better showing by cables and the rainfall in the best overnight. Early advices told of some heavy ones and it was assumed that later reports would add to such, all of which could have been done without to the advantage of the crop, as one of the chief needs now is sunshine and warm weather. October started at 25,90c, up 40 points, but a dip to 25,65c was had before the tide turned. The nest of the session saw the tendency upward, although liberal selling at times brought irregularity. Details of the weather showed that at least half the belt had rains, ranging from light to heavy. The forecast was rather favorable, however, and oncouraged hesitancy, for it promised little rain. Sentiment was distinctly better and the fact that after tomorrow there will be a triple holiday helped to induce covering by shorts. October soid as high as 27,20c, which was 170 points over yesterday's lowest and 155 over the low of this morning, after which some profits were accepted, as sentiment continued dublous as to any material improvement in the price level just at this time.

From the spot department came little that was new. In Texas sales were

material improvement in the price level just at this time.

From the spot department came little that was new. In Texas sales were moderate and quotations were higher along with futures, for the two work closely together, as most of the business out there is done on a basis with the contract market. Houston reported sales 5,729 bales, middling at 28,50c, while Dalias reported them 2,093, with middling up 125 points to 28c. New Orleans revised quotations, elevating two of the low grades 175 points, but reducing low middling and better 25 points, middling 28c, with sales for the day only 23 bales. I

Memphis made no change and reported sales 100 bales.

NEW YORK COTTON.

NEW YORK, Sept. 2.—The cutton market showed continued nervousness during today's early trading but there was a good deal of covering after yesterday's hig break and after opening steady at an advance of 12 to 48 moints, active months soon sold 42 to 65 points net higher. There was further liquidation and scattering pressure promoted by the weakness of Southern spot markets late yesterday and nervousness over the labor situation at home and abroad. Private cables, however, said there was a slightly better feeling over the coal mining situation in England and the disposition to take profits on short contracts here was promoted by rains in the central belt and the approach of the holidays. October sold up to 26 life and December to 24.75c before the end of the first hour.

Liverpool was credited with selling a good deal of cotton here during the

were reactions of 20 to 30 points early in the noon hour.

Offerings seemed to be quickly taken on the midday reactions and the market showed renewed strength during the afternoon. October contracts were relatively firm, selling up to 27.05c, or 155 points net higher, while other months showed net gains of 102 to 123 points on covering, accompanied by prediction of an increased mill demand after Labor day and talk of light ginning figures next week.

Futures closed easy at advance of 150 to 30 points.

—Close— CHICAGO, Sept. 2.—Wheat took an upward swing in price today, the strength being ascribed to prospects of a continued good export demand. Advance Continues in Speculative Rails, But Market Dull in Most Sections.

NEW YORK, Sept. 2—An advance of two points in the preferred shares of the Cleveland, Cincinnati, Chicago & St. Louis road at the opening of today's stock market pointed to a continuance of the recent broad buying movement in speculative rails. Other transportation stocks were fractionally higher with several of the steels, equipments and oils, but trading in other quarters of the list was more contracted than at any recent period.

Recent leaders such as Replogle Vanadium, Bethlehem and U. S. Steels, became more active at midday gaining one to two points. Sentiment was favorably influenced by the decline of call money to 7 per cent, Rails were less prominent but yielded none of their advance,

Chicago.—With export sales at Atlantic and Gulf ports, especially at the Gulf, aggregating one million bushels per day or nearly as large as primary arrivals, there is a disposition on the part of many traders to regard the wheat situation as bulkish. Many commission houses advise against sales of wheat on bresks and are getting a few buying orders. One New York house reported the sale of one million bushels wheat for France, Germany and Italy. A few cash handlers look for premiums to decline, which should induce selling by local traders, who are in the main bearish on general conditions.—Tribune.
